PROJECTS

- **Java based web-application CI/CD with Declarative Pipeline:**

I developed a project implementing continuous integration and continuous deployment using a declarative pipeline. This involved automating build, test, and deployment stages to streamline software delivery and improve reliability.

- **Swiggy app deployment CI/CD using GitHub Actions:**

In another project, I set up a CI/CD workflow using GitHub Actions to automate code integration, testing, and deployment. This enhanced collaboration and ensured efficient delivery of updates through version control and automated pipelines.

SOFTWARE SKILLS

- Languages : C, C++, HTML,CSS
- Devops Tools : Docker, Jenkins, Kubernetes, Ansible,Terraform,Github Actions.

ADDITIONAL SKILLS

- Languages : English, Hindi
- Soft Skills : Problem Solving, Leadership.
